Chancellor, DMIMS (DU)
Ex-member of Parliament

19 - 21 JANUARY 2018

INTERNATIONAL CONFERENCE

A Y U R V E D A f o r
GLOBAL WELL-BEING

Dear Colleagues,

Despite increased global healthcare spending, there has been an increasing incidence, and severity of diseases pointing to impaired health of the populace. This progressive deterioration in general health increased in healthcare costs that have hampered the economy of many countries. It is interesting that the WHO's integrated definition of health was actually articulated 2,000 years ago. Sushruta defined health as a physiological balance added to a psycho-sensual happiness. An ideal health care system as defined by Ayurveda is one which cures a disease without causing or precipitating other illness. Thousands of years ago, Ayurveda pointed out the importance of a preventive over a curative approach, because it has an impact for many generations.

The main focus of the theme of Conference “Ayurveda for Global Well-being” will be accomplished by involvement of all stake holders involved in education system, delivery of health care services & research, standardisation of Ayurveda therapies, regulatory experts and policy makers for the establishment of Ayurveda as evidence based medicine for Global well-being. Organizers are longing to document the conference outcomes in the form of possibilities of strategic combination of Ayurveda Principles & Practices and modern research tools to create a complete healthcare system for the Global Well-being. We hope this system will be called as Symbiohealth and it will be potentially more effective and less expensive devoted for healthier society.

The venue for this International Conference is Mahatma Gandhi Ayurved College Hospital and Research Center a constituent college of Datta Meghe Institute of Medical Sciences (DU), one of the premier institute in the field of Ayurveda Education, Research and Patient Care. Institute is situated at Wardha- a city where comes

alive the amalgam of Social and Spiritual aspects. Wardha city has played major role in freedom movement from the year 1934, when Mahatma Gandhi was staying in Wardha. The Indian freedom movement, 'Satyagraha' of 1940, 'Bharat Chhodo' (Leave India) movement was originated in Sevagram Ashram. Apart from Bapu Kuti in Sewagram and Vinobaji Bhawe Ashram in Pavnar there are Bor and Tadoba Tiger reserve which are close to Wardha. City is well connected by rail, road and nearest Airport is Nagpur which is 70km from Wardha. The weather remains very pleasant in January, inviting hordes of visitors to Wardha- the Gandhi City.

International Conference will be a great opportunity to interact with erudite scholars of Ayurveda and Modern Medicine to benefit from their knowledge and experience. In this conference Clinicians, Researchers, Policy Makers and Academicians from all over the world will illuminate the time-tested knowledge of Ayurveda with up-to-date research insights from modern science and the congregation will showcase scientifically verified solutions to Global Health problems. Vaidyas and health professionals engaged in Ayurvedic research will present their findings for the well-being of Humanity.

All health professionals, Academicians, researchers, students, policymakers and administrators in the field of health are invited to join the conference to gain insights to achieve the objective of complete health at affordable cost for Global Well-being.

Dr. Shyam Bhutada
Dean, MGACHRC,
Chairman, Organizing Committee

The International Conference on “Ayurveda for Global Well-being”
